

3rd UK SPACE MEDICINE CONFERENCE

Saturday 30th September – Sunday 1st October 2006

National Space Centre, Leicester

*Annual meeting of the UK Space Biomedical Group
Supported by the Space Medicine Association, Aerospace Medical Association*

This popular unique national meeting is aimed at health professionals and students with an interest in the emerging speciality of Space Medicine and Space Life Sciences research. The weekend consists of lectures, discussions, posters and an exhibition area. Topics covered by national and international speakers will include:

- *CPR in microgravity and hypogravity (Moon and Mars)
- *Medical implications for space tourism
- *Space life sciences research at the European Space Agency
- *Surgery in space
- *Disuse atrophy in microgravity and old age
- *Intravenous fluid production for space travel: UK research with NASA
- *What the UK has done (and has to offer) space life sciences research
- *Pulse reverse osmosis: standing space research on its head

A student poster competition will also take place. Contact Alyson Calder for details.

CPD points pending.

Fees: Health Professionals: £150, Students: £75

(includes coffees, lunch and free admission to the National Space Centre).

Places are limited.
